SUMMARY

Dynamic and motivated software engineer with a focus on translating ideas into reality. Robust foundation in app development, proficient in all stages of app design and development. Skilled in hands-on development of innovative applications and software solutions, including personal projects and startup ventures. Specialized in understanding unique requirements and delivering tailored solutions. Embraces change, stays current with new languages and technologies, actively seeking opportunities to make a meaningful difference.

EDUCATION

University of Colorado Boulder - *Bachelor of Arts in Computer Science*

Spring 2024

PROJECTS AND ACHIEVEMENTS

Oxchord - *Full Stack Developer & Mobile Developer*

2022-Present

- Startup born to solve an issue in the indie music scene. One of three founders who collaborated to address local artists' need to connect with each other and their local music community. Oxchord facilitates real time collaboration and venue sharing
- **Officially released to the App Store in October!** After trialing our MVP on Testflights and months of back-and-forth with the iOS App Store compliance team, I launched my first app to the App Store
- Frontend built using React and backend using Node.js and C#. Compatible with iOS, Android, and Web

TRNDapp - *Full Stack Developer & Mobile Developer*

2021-2023

- Collaborative startup founded with friends to build community and expand on real world project implementations. The app goal was to make it easier for friend groups to connect in their cities
- Built for both Web and Mobile use, implemented with Javascript, Angular, and Ionic. Self taught Angular.js, REST API, AWS DynamoDB

HackCU X - *Winner for UI/UX Track*

2024

- Ideated and created a high-fidelity prototype for Metanoia, a low-commitment, journal-time capsule hybrid that was housed via Chrome extension. Primarily used Figma

SKILLS AND LANGUAGES

Coding/App Development - Javascript/Typescript, HTML, CSS, Angular, C/C++, C#, Java, React, Ionic, Git/Github, Figma, AWS, Node.js, Python, SQL, Postgres, Copilot

Productivity and Communication - Slack, Notion, Google Workspace, Microsoft Office Suite, Agile

Spoken and Written Languages - English (fluent), Indonesian (fluent), Mandarin (intermediate)

Additional Skills - Public Speaking, Problem Solving, Time Blocking and Focus, Adaptability, Flexibility, Team Management, Conflict Resolution, Debugging, Paper Making, Master in TFT

LEADERSHIP ROLES AND ACTIVITIES

CU Boulder Gaming - *Events Coordinator*

2018-2021

- Aided the planning and execution of events for CU Boulder's largest student club

Society of Asian Scientists and Engineers - *Conference Chair*

2018-2020

- In 2018-2019, lead the team which planned the West Mountain Regional Conference
- In 2019-2020, was asked to replicate my duties and responsibilities for the North Eastern Regional Conference - the largest of all the regional SASE conferences

WPI Pan-Asian Festival - *Event Coordinator*

2017-2018

- Pitched and formulated the first-ever on-campus experience to represent all Asian heritage clubs and create an event that would be greater than the sum of its parts
